FOR IMMEDIATE RELEASE - February 5, 2014 - Pro-Pet LLC, St. Marys, Ohio, has initiated a voluntary recall of a limited number of Dry Dog and Cat Foods for possible *Salmonella* contamination. A single field test indicated products manufactured during a two day period, on a single production line may have the potential for *Salmonella* contamination. Pro-Pet LLC is voluntarily recalling the potentially impacted products made during this timeframe. There have been no reports of illness related to this product to date.

Salmonella can affect animals eating the products and there is risk to humans from handling contaminated pet products, especially if they have not thoroughly washed their hands after having contact with the products or any surfaces exposed to these products.

Healthy people infected with *Salmonella* should monitor themselves for some or all of the following symptoms: nausea, vomiting, diarrhea or bloody diarrhea, abdominal cramping and fever. Rarely, *Salmonella* can result in more serious ailments, including arterial infections, endocarditis, arthritis, muscle pain, eye irritation, and urinary tract symptoms. Consumers exhibiting these signs after having contact with this product should contact their healthcare providers.

Pets with *Salmonella* infections may be lethargic and have diarrhea or bloody diarrhea, fever, and vomiting. Some pets will have only decreased appetite, fever and abdominal pain. Infected but otherwise healthy pets can be carriers and infect other animals or humans. If your pet has consumed the recalled product and has these symptoms, please contact your veterinarian.
