Concord, NH – The New Hampshire Department of Health and Human Services (DHHS) is announcing a voluntary recall of Joey's Jerky brand Chicken Jerky due to possible Salmonella risk. A total of 21 people in Merrimack and Hillsborough Counties have been identified with the same strain of the illness, but no deaths have occurred. Joey's Jerky is produced in New Hampshire and the manufacturer, Kritter's Kitchen Kreation, LLC, has voluntarily recalled all of the product. Joey's Jerky was sold at the following six stores: America's Pet in Hudson, Blue Seal in Bow, K9 Kaos in Dover, Osborne's Agway in Concord, Sandy's Pet Food Center in Concord, and The Yellow Dogs Barn in Barrington. DHHS is asking people to check if they have any of these jerky treats at home and to discard them.

Through investigation and interviewing the ill people, the DHHS Bureau of Infectious Disease Control determined that the jerky treats were implicated in spreading Salmonella. Confirmation through laboratory testing of the jerky is pending at the New Hampshire Public Health Labs.

Salmonella is a bacterium that causes the diarrheal illness Salmonellosis, which can be serious in some patients. Symptoms also include fever and abdominal cramps within 12-72 hours after infection. The illness usually lasts from 4 to 7 days. Although most people recover without treatment, severe infections may occur that may move to other body sites and in rare cases can cause death unless the person is treated promptly with antibiotics.

"While uncommon, pet food and treats can sometimes be contaminated with Salmonella, which is why it is so important for pet owners to wash their hands after handling pet food and treats," said Dr. José Montero, Director of Public Health at DHHS. "I want to commend the manufacturer of Joey's Jerky for their cooperation in this investigation and the epidemiologists here at Public Health for their excellent work. Salmonella can be a serious illness and the sooner the source of an outbreak is identified the sooner it can be stopped."

For more information on Salmonella, contact the DHHS Bureau of Infectious Disease Control at 603-271-4496 or visit the DHHS website at www.dhhs.nh.gov (<http://www.dhhs.nh.gov>) or the Centers for Disease Control and Prevention (CDC) at www.cdc.gov/salmonella (<http://www.cdc.gov/salmonella>) .
