## Announcement

Vitakraft Sun Seed Inc. of Weston, OH, is voluntarily recalling certain Sunseed Parrot Fruit & Vegetable diet and Sunseed SunSations Rabbit Food due to a potential *Listeria monocytogenes* contamination. *Listeria monocytogenes* is an organism, which can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Healthy individuals may suffer only short-term symptoms such as high fever, severe headaches, stiffness, nausea, abdominal pain and diarrhea. *Listeria* infection can cause miscarriages and stillbirths among pregnant women.

*Listeria monocytogenes* are present in the gut of birds and rabbits. Household pets such as birds and rabbits carry a risk to humans. Even if the birds and rabbits do not appear to be sick after consuming foods containing *Listeria monocytogenes*, they can become carriers of *Listeria monocytogenes* and transfer *Listeria monocytogenes* to the environment.

Vitakraft Sun Seed was notified on June 14, 2017 by its supplier of dried apples that the ingredient has the potential to be contaminated with *Listeria monocytogenes*. Although there has been no reported evidence of direct contamination of the dried apples, our supplier has initiated the recall. To date there have been no report of any illness.
