Company Announcement

The Lennox Intl Inc located in Edison NJ, is voluntary recalling its Natural Pig ears because they have the potential to be contaminated with *Salmonella*. *Salmonella* can affect animals eating the product and there is risk to humans from handling contaminated products, especially if they have not thoroughly washed their hands after having contact with the products or any surfaces exposed to these products which are solely for the consumption by dogs.

Healthy people infected with *Salmonella* should monitor themselves for some or all of the following symptoms: nausea, vomiting, diarrhea or bloody diarrhea, abdominal cramping and fever. Rarely, *Salmonella* can result in more serious ailments, including arterial infections, endocarditis, arthritis, muscle pain, eye irritation, and urinary tract symptoms. Consumers exhibiting these signs after having contact with this product should contact their healthcare providers.

Pets with *Salmonella* infections may be lethargic and have diarrhea or bloody diarrhea, fever, and vomiting. Some pets will have only decreased appetite, fever and abdominal pain. Infected but otherwise healthy pets can be carriers and infect other animals or humans. If your pet has consumed the recalled product and has these symptoms, please contact your veterinarian.

The recalled products affected were shipped to nationwide distributors and/or retail stores from May 1st, to July 3rd, 2019.

The product comes in an 8 PK branded pouch under UPC 742174 995163, 742174994166 or packaged individually shrink wrapped under UPC 0385384810, and 742174P35107. All UPC codes are located on the front label of the package.

To date, Lennox is aware of two cases of our pig ears that caused dog illnesses which may be related to the potential *Salmonella* contamination noted during an ongoing FDA investigation of *Salmonella* illness, associated with what appears to be a multiple source.
